

Memo:

The SDDOT staff is designing the pavement thicknesses for the 20<sup>th</sup> Street South BUILD Project. They have requested that the County of Brookings and City of Brookings select the type of pavement they prefer for their respective segments. The SDDOT is recommending concrete pavement for the segment of 20<sup>th</sup> Street South approximately 660' west of the southbound ramps to 660' east of the northbound ramps. The approximate thicknesses of each pavement option are:

- 5.5" of asphalt pavement on 12" of gravel base course
- 8" of concrete pavement on 5" of gravel base course

This agenda item will involve selecting the pavement preference for the segment of 20<sup>th</sup> Street South between 660' east of the future northbound ramps to 34<sup>th</sup> Avenue.
