Describe Location of Project: Intersection of 210 St and 479th Ave

Reason for request/describe issue: To Alleviate almost yearly flooding and gravel wash from the Road. In the 1960's this was upgraded from a true spillway to a Normal Rd, Now the (Culverts) Concrete are not together on the Ends and some are Added on with different Sizes

Safety/emergency implications: Creates Huge Ruts in the Road. Had to Repair 3 times in 2019 210 Ends at the site so causes a lot of traffic detours

Solution for problem: Replace one of the 20 inch Culverts with a 36 inch Raise the grade 12" for 500 ft in each direction. Go on private land and Build a Berm. Berm was destroyed in 2019

Number of County Residents affected: 15 Estimated Completion Date: Nov 1st 2020

One time Problem Re-occurring Problem

If re-occurring, state future solution for the problem: See above

Will the culvert be replaced with a like-size culvert: Yes No If no: additional permitting may be required.

Total Project Cost: 11,000 County Assistance Requested: 5,500 Township Match: 5,500

Bid Proposal/Estimate from contractor must be attached to this application TruNorth Steel order form must be attached to this application
