Headwall and wingwall designs should be in accordance with all applicable state and local guidelines and regulations. Designs should be performed by a qualified engineer and site conditions should also be evaluated by a qualified geotechnical engineer.

*Proper protection of headwalls and wingwalls in the form of rip rap, concrete paving or other permanent erosion protection methods is strongly recommended.
 Streambed scour analysis should be the basis for this erosion protection design.*

TrueNorth Steel is available to assist with CSP headwall designs. We can meet you on your jobsite to evaluate your application and situation.

Pricing is for listed diameters, dimensions and gauge combinations only. Any modifications required will be subject to pricing change for additional labor, engineering, or materials.

Contact your local representative for support or pricing.

24'-0" TrueNorth Steel Pre-engineered Modular Steel Bridges 2025

TrueNorth Steel bridges are pre-engineered and stamped by a registered South Dakota engineer.

Outside bridge modules include TL-1 rated guardrail system and SD DOT style tube steel turn-down assemblies at all four corners of the bridge.

TrueNorth Steel bridges are fabricated from low maintenance weathering steel and galvanized steel bridge deck.

Bridges are engineered and configured to accept ballast, asphalt, or concrete finished wearing surface decks.

TrueNorth Steel bridges are produced in our own AISC certified fabrication facilities.

Onsite assistance and project review can also be provided by our territory managers and in-house engineering team.

TrueNorth Steel bridges can clear span up to 220' without any intermediate piers.

TrueNorth Steel bridges are very light weight and can be installed by county crews.

For skewed ends and custom widths please contact TrueNorth Steel sales representative for pricing.

Bridges longer than 90' require a field splice to achieve those longer spans.

Please note - the pricing information provide here is based on 24' wide bridges consisting of (3) modules, with 4 1/4" bridge decking shop installed and HL-93 loading.
